

HP Design Jet Z9 dr V-trimmer Poster Printer

Poster Printing

The Cleburne Public Library maintains an HP Design Jet Z9 dr V-trimmer Poster Printer which patrons may use to print poster-sized documents. Please note that the library does not proof these posters, and the user is responsible for any and all spelling, grammatical, and graphical mistakes.

Please save your document as a JPEG, and specify any related information such as number of copies. You must submit your poster as the size you wish it to be printed out as. We are unable to resize posters for you. Microsoft Publisher is a great software to help you size an object. We have it available at the library, if you need help, please bring in your file and we can help you size it and save as a JPEG. The easiest way to bring your poster design is as a JPEG file on a USB. You will be contacted when your poster is available for pick up.

The cost of poster printing is \$3.00 per per linear foot.

***If a misprint occurs due to a printer malfunction, the makerspace will print a replacement free of charge.
If a misprint occurs due to an improperly sized or invalid image, the library is not responsible.***
