

Ashford Rigid Heddle Weaving Loom

We recommend the Rigid Heddle to new weavers because it is so easy to use, but still very versatile. You can use the loom to create cushion covers, table mats, fabrics and garments, floor mats, just about anything.

This loom has just been updated to come with a built in double heddle rest. This improved loom also has holes drilled on the back, which when paired with the warping peg upgrade kit allows your loom to double as a warping board. A warping board can make long warps quicker than using the direct warp method.
